

RK Series 15-75 VSD

Variable Speed Drive Rotary Screw Air Compressor

ECO-FRIENDLY

Efficiency Under Pressure

Industries Served

RK 15-75 VSD Series

Features & Benefits

Vented Electrical Cabinet

Vented for maximum cooling of the drive (conveniently accessed from the front of the machine)

Oversized Air/Oil Cooler

Easy-to-access and oversized to allow for higher ambient operating temperatures

Spin-on Filtration

Spin-on air/oil separators and oil filtration allow for quick and effortless replacement

Condensate Trap

The standard condensate trap, located at the discharge of the air cooler removes bulk water. Includes electric solenoid drain valve.

Low RPM Air End Assembly

The oversized air end assembly allows for a low RPM design which provides reduced maintenance, cooler running conditions, and an extended life expectancy.

Direct Drive Design

Direct drive eliminates gear-sets which increases efficiency and reduces noise and vibration levels

Integrated Oil Sump Tank

The oil sump tank is integrated directly with the air end, filtration, thermal valve, and MPCV. This feature reduces hose connections and lessens the chance for oil leakage, and provides a compact design.

TEFC motor (totally enclosed fan-cooled)

As standard, all RK-VSD units come packaged with a TEFC motor. This feature protects the motor against dirty environments which increases bearing life and the overall longevity of the compressor.

More Features

Benefits

VFD Drive

Significant energy savings

Cycling Cooling Fan

Energy savings/longer life

Low Sound Enclosure

Quiet operation

On-Demand HP

Production flexibility

Removable Panels

Reduced service downtime

Minimal Hose Design

Reduced chance for oil leakage

Compact Footprint

Installation flexibility

RK 15-75 VSD Series

Inverter and Controller

Specifications

VSD Inverter

UNLIMITED MOTOR STARTS PER HOUR

No inrush current to overheat the motor

CONSISTENT DISCHARGE PRESSURE

Set a 'target' pressure rather than load/unload setpoints. Consistent pressure means consistent production results.

SOFT MOTOR STARTS

As opposed to full voltage motor starts on most fixed speed machines, the VSD drive initiates slow motor starts, thus significantly lowering the demand on your electrical meter

UP TO 85% TURN-DOWN

The VFD runs the machine between 15-100% capacity in order to meet current demand.

REDUCED POWER CONSUMPTION

Unlike a fixed speed machine, KW consumption stays on par with your compressed air demand, resulting in significant energy savings.

Electronic Controller

PRESSURE PARAMETERS

Set target pressure to match your exact demand

CURRENT DUTY CYCLE

Monitor the demand that production is putting on the compressor

MAINTENANCE TIMERS

Track and set your maintenance schedule

ALARM CONDITIONS/RESET

Past and current alarms are recorded, allowing for quick diagnosis

COOLING FAN CONTROL

Controls the air/oil cooling fan based on actual oil temperature conditions. Fan cycles only when needed.

DISCHARGE PRESSURE

Displays current air discharge pressure

OIL TEMPERATURE

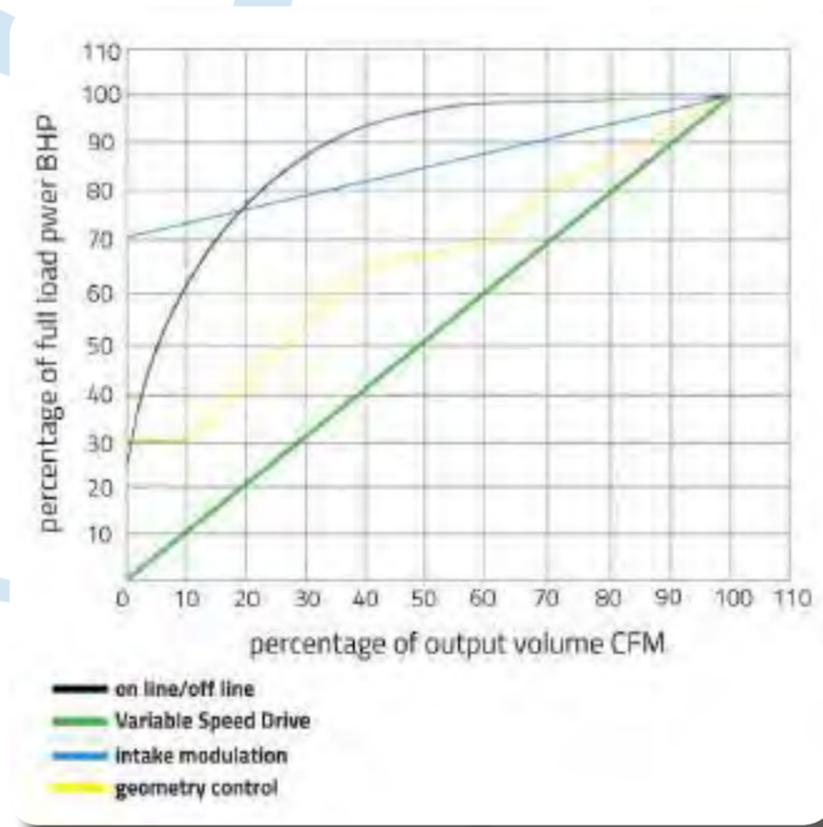

Protects against overheating by allowing this critical temperature to be easily monitored

PHASE MONITOR

Prevents reverse rotation and protects against power loss damage

Model	HP	KW	CFM	PSI	dBa	NPT	Voltage (3ph)	Dimensions	Weight

Pneu-Assure

Why PneuTech?

5 year warranty on all major components*

- ✓ Parts and labor warranty for 1 year (excludes regular maintenance)
- ✓ 5 year warranty on major components including:
 - ✓ Airend
 - ✓ Oil Sump Tank
 - ✓ Electric Motor(s)
 - ✓ Air Coolers
 - ✓ Oil Coolers
- ✓ Guaranteed full support from your certified distributor
- ✓ Global technical experience leading to a well-rounded point of view on machines and industry standards

Personal Service
Technical Support
Customer Satisfaction
Reliable
Receptive & Adaptable
Ethical
Industry Experienced
Global

You are the number one priority when you partner with PneuTech. Your goals are our goals because your success is our success. Your experience is superior when partnering with PneuTech because of quality products and personal service. You want efficiency, reliability and versatility with the supply of air compressors and all associated equipment - so that's what we strive for.

*Warranty subject to change based on region and distributor's agreement.

**Warranty is only valid providing a PneuTech approved service technician does the maintenance on the compressor.

Other PneuTech Products...

RK Fixed Speed Compressors

The RK fixed speed compressors have a compact design, making it a great solution for many applications. These belt driven units make maintenance an easy task when the time comes. With large, easy to remove doors, the belt, oil, and filter changes are a breeze.

CSO Condensate Separators

The CSO 40-1250 series condensate oil water separators have been developed for excellent separation of lubricant and oils from condensate generated from rotary screw, rotary vane, and other types of compressor equipment. These units allow for EPA friendly disposal of your condensation.

RSP 40-450 Compressors

The RSP series fixed speed rotary screw air compressors are an exceptionally durable line of higher horsepower air compressors. Routine maintenance is simplified because of this unit's unique belt drive design and easily removable panels (when applicable). Two options that are available with this model of air compressor are low sound enclosure and/or TEFC motor.

FHO Inline Filtration

FHO inline filtration comes standard with differential pressure gauges and are protected with an interior and exterior powder coating finish. They hold a replaceable filter that can be quickly and inexpensively maintained. All housings come standard with internal float style drain valves.

RSP-VSD 40-450 Compressors

The RSP-VSD series air compressor has a VFD inverter that helps you adapt to your factory's fluctuating demand and thus save money and increase efficiency. The electronic controller on this machine allows you to easily program your pressure parameters, maintenance schedule, auto pressure scheduling up to 28 times per week, alarm diagnostics, web access, and so much more!

NGN Nitrogen Generators

The PneuTech Modular Nitrogen Generation system is a cost saving alternative to buying bottled nitrogen from another company. A relatively low initial investment combined with very low operating costs results in savings up to 60%! It's modular design allows it to fit through standard door openings and it can be handled easily by manual pallet lifts.

RDF Refrigerated Dryers

The RDF series non-cycling dryers provide high quality of compressed air and deliver lower dewpoints at a relatively low initial cost. These dryers are compact in footprint and extremely reliable, requiring little maintenance. They come standard with a programmable controller, a digital dewpoint indicator, and an aluminum heat exchanger.

Providing
high efficiency
Delivering
exceptional value
of ownership

Mission Statement:

Using our combined industry experience, we provide knowledge, support, and superior products to compressed air distributors across the globe. We are committed to producing positive results through being trustworthy, ethical, and accessible. We are founded in the beliefs that through working together we can continue to transform the industry, while rising to turn challenges into opportunities.
